APPRENTICESHIP PROGRAM

About the Program

VCU's Facilities Management is launching an Apprenticeship Program giving individuals that are interested in an opportunity in a career as a skilled tradesman through structured on -the- job training, technical education, and related classroom instruction through a four-year program.

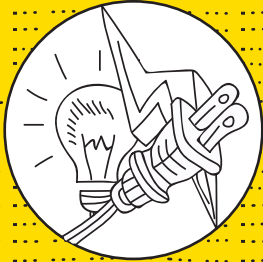

The selected trades for the Apprenticeship Program are identified based on the business needs of Facilities Management.

Apprenticeships will be offered in the following trades:

Apprentices will be hired as a full-time university and academic professional employee with salary and benefits. Our apprentices will work hand in hand with licensed journeymen, their mentors, supervisors and other key employees to ensure they receive the skills and knowledge to become a highly qualified in their chosen trade.

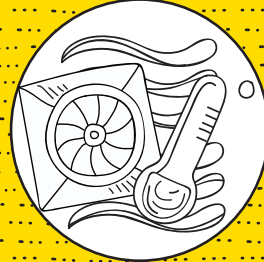

Electrician

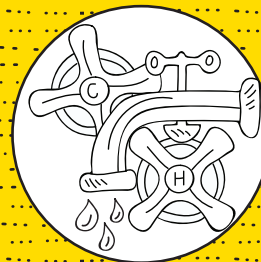

Locksmith

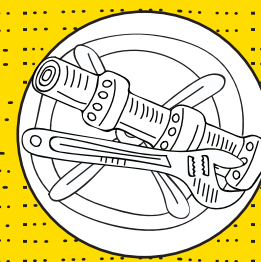

HVAC Technician

Plumber

Steamfitter

Program Requirements

Over the course of the four year program apprentices will be required to work full-time, complete more than 400 hours of structured classroom instruction in which they will be required to attend classes, and receive a passing grade of a C in addition to abiding by the policies and rules of the technical institution they attend. Apprentices will be evaluated on their work progress in the program through class reports and assessments. To learn more information please visit:
